

WE ARE GREEN!

We at Vision Display are working hand-in-hand with international partners in initiating environmentally friendly and ecologically responsible practices. We are adapting to the needs of the environment on how we can do our part to protect it and sustain its natural resources for the future generations.

We have sourced the most eco-friendly materialst from inks to finishing products, we are confident that Vision Display is delivering the best-in-class solutions.

efi EPSON®

INK

Green printing solutions, like LED "cool cure" technology from EFI™, bring you closer to achieving a smaller environmental footprint and greater profitability with every print.

MEDIA

Get your large format printing done with 100% Polyester, PVC-free and recyclable material.

PROTECTION / LAMINATING

Provide different variety of environmental friendly materials including PVC free, Waterbased adhesive, M1 flame retardant, ASTM 84E flame retardant and paper-based surface specifications.

GO GREEN

G-BOARD®

MOUNTING

We provide wood fabrications, poster printing, floor graphic sticker printing services, etc., with environmental friendly material.

FINISHING

PVC free and UV protected material that will not rust when set outdoors. It is nearly invisible, which help to improve the look of banners

INK

The **GREENGUARD** certification is granted to products that meet some of the world's most rigorous chemical emissions standards. The **GREENGUARD Gold** standard includes health-based criteria for more than 360 VOCs and also requires lower total VOC emission levels to ensure that the products are acceptable for use in sensitive environments.

Vutek 5r+ UV LED Curing Technology

Vertically integrated inks are optimized for our digital LED printers, ensuring their maximum reliability, efficiency and performance.

Inks Made Safe For You And The Environment

UltraChrome GS3 series eco-solvent ink is UL GREENGUARD Gold Certified.

MEDIA

Vision Display has made a big commitment to the environment. We offer our customers multitude of large format graphic materials that are recyclable or biodegradable printing options and help your business **GO GREEN** with certification around the world.

PONGS® Artist Mambo PTX

Designed for

- Architectural Design
- Backlit Frames
- Exhibition / Retail

- Lightbox Graphics

PROTECTION

No PVCs, No Phthalates, No Problem. Our overlaminates have earned the prestigious GREENGUARD Gold Certification. This certification requires that products meet some of the world's most rigorous third-party testing standards for low emissions of volatile organic compounds into indoor environments. Now you can offer a greener graphic solution that will contribute to healthier indoor air quality.

FINISHING

REDUCE — REUSE — RECYCLE! Pursuing sustainability is an act of mindfulness. We can't always opt for the recyclable product but we can be deliberate and informed about how we make our choices. Finding creative solutions to offset the long-term effects that our purchases have on the planet is an important step towards sustainability and a healthy future for everyone.

Environmentally Responsible

- Free of PVC
- Free of heavy metals (cadmium, lead and mercury)
- Free of anti-corrosives (hexavalent chromium)
- Free of Chlorides and Phthalates
- UV protected
- Food grade (EU and American FDA)
- Environmentally friendly, perfect match for printers using green inks & medias
- Cal Prop 65 compliant (tested by QUIMA, formerly AsianInspection)

Recycling Advantages

- PLASTGrommet offers the only true recyclable eyelets in the market
- Using them, PP and PE banners are totally recyclable in the and sorting technology
- Certified by AIMPLAS with project #PRO08-0184
